

Environmental, Health and Safety Policy

Chassix is dedicated to environmental protection, employee health and safety, regulatory compliance and pollution prevention through a continuous improvement and team based approach. The foundation to achieving our commitment is based upon:

- Fulfilling all compliance obligations and integrating environmental, health and safety requirements into our business activities
- Continual improvement in the manufacture of globally competitive products utilizing sustainable and efficient production methods and practices
- Setting environmental, health and safety objectives for the prevention of pollution and elimination of health and safety hazards in our workplace
- Demonstrating environmental stewardship and sustainability within the communities in which we operate
